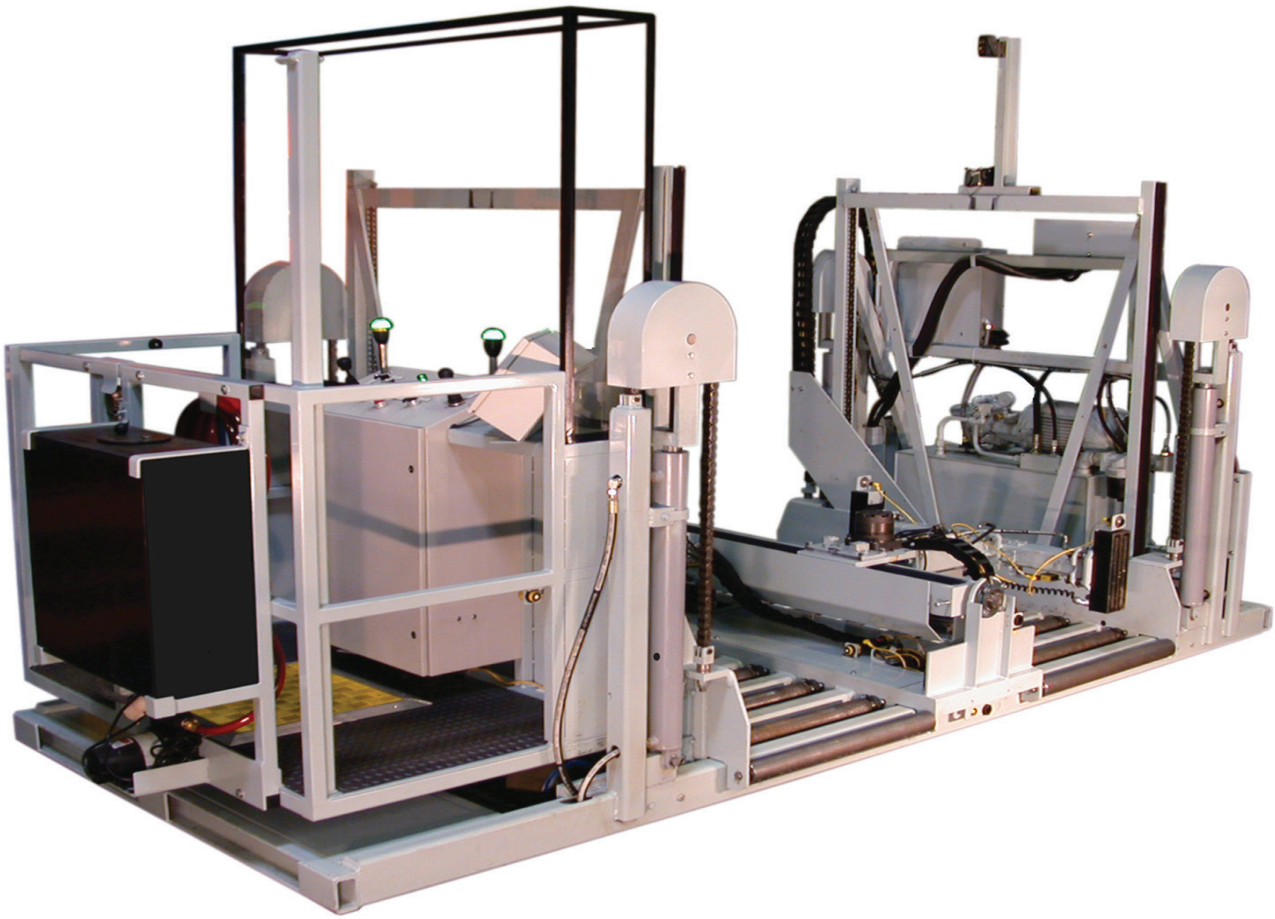
Hydra-Handler ELITE *Automated Battery Changing System*

Drive Productivity, Safety and Efficiency !



- Allows forklift driver (**not dedicated personnel**) to Change batteries by automatically positioning the Hydra-Handler.
- **Eliminates equipment damage** to forklifts, batteries, charging stands and battery changer with its unique use of laser photo eyes and ultrsonic sensors.
- **Reduces battery changing training** by including "lighted wand" (green = go, red = stop) handles and step by step screen prompts on the operator display.
- **Speeds up battery changes** by automatically traveling to preprogrammed battery changing positions.
- **Maximizes battery life** and **reduces** the **batteries** and **chargers required** with built in First-In, First-Out battery management software.

ANNUAL SAVINGS PER BATTERY

$1,283

$46	Battery Rotation
$65	Equipment Damage
$152	Speed of Change
$1,020	Labor Savings

Example: 96 Battery Changing System

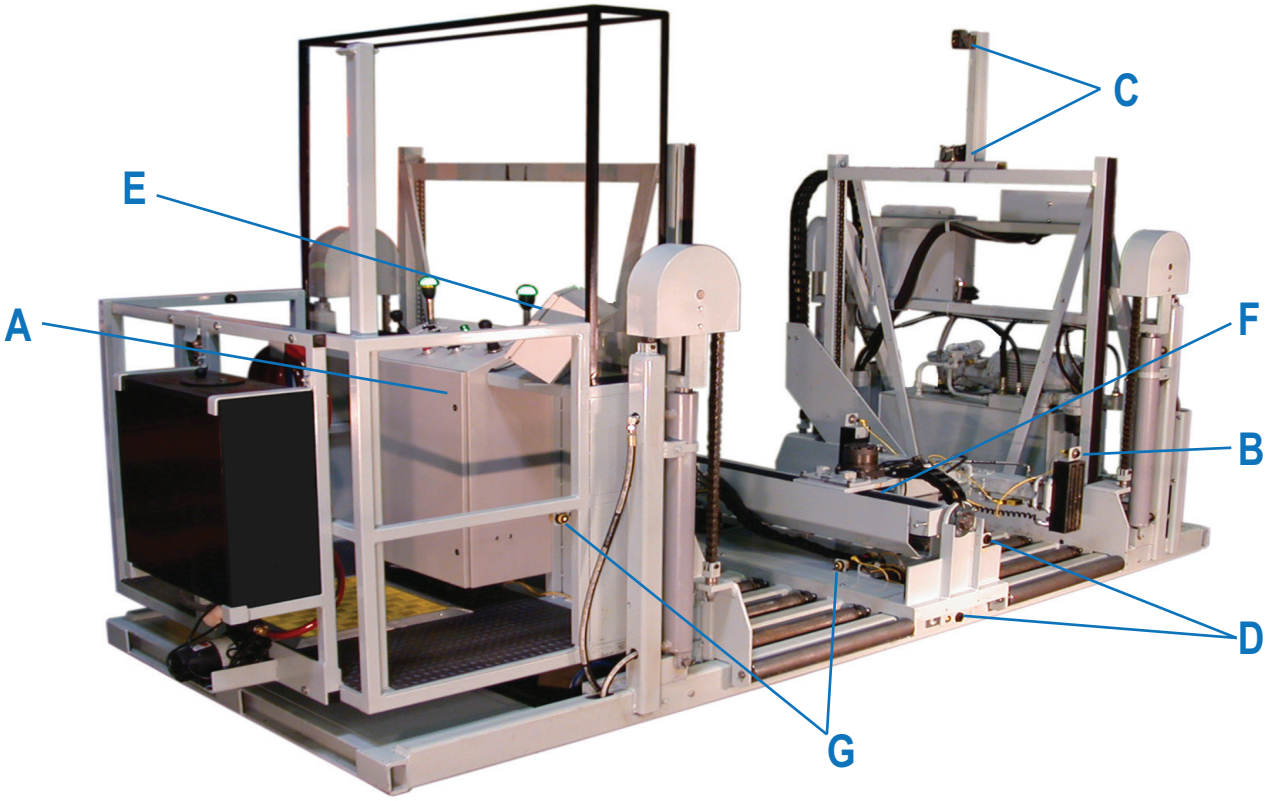
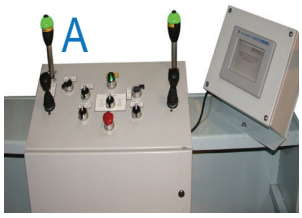
Hydra-Handler ELITE *Automated Battery Changing System*



FEATURES

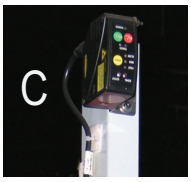


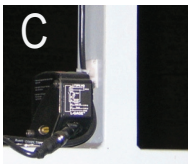
Modular control center

Lighted Wands

Simplifies operator tasks

Lasers



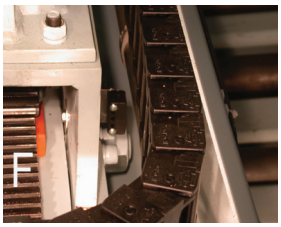


Measures distance and height of Hydra-Handlers

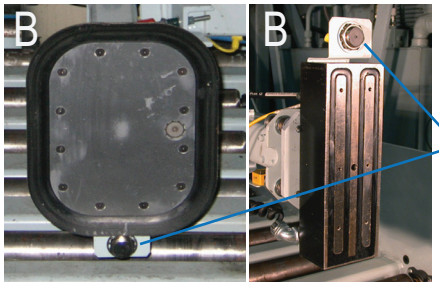
Laser photo eyes

Identifies position of battery compartment in lift truck

Transducer



Measures position of extractor arm



Locates battery compartment on lift truck

Extractor arm /w magnet or vacuum

Operator display

Guides operator through change-out process

Ultra-Sonic Sensor

Verifies position of lift truck and battery in Hydra-Handler
