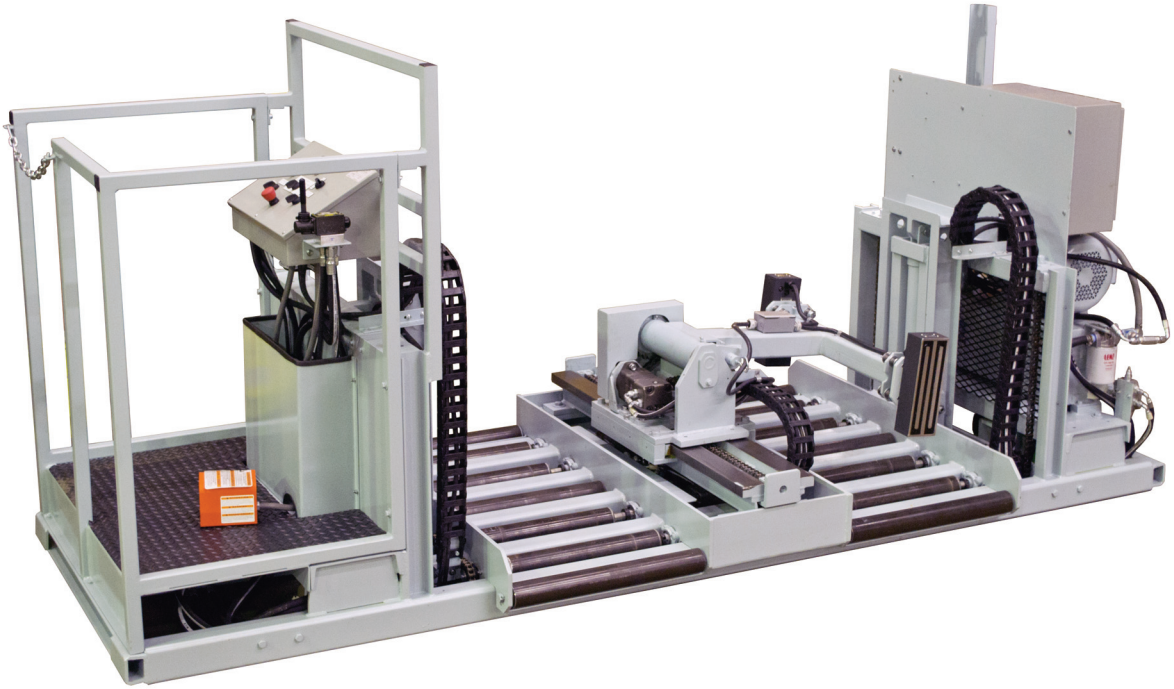
Hydra-Handler SUPER



Single or Double compartment available (single shown)

The Hydra-Handler SUPER is a narrow single stack battery changer with one or two compartments. This **narrow footprint** and **single level** design allows the Hydra-Handler SUPER to be powered via **AC or DC operating voltage**. Customers converting from an overhead, manual, or pallet jack mounted battery exchange system can cut their battery change times in half with the **Hydra-Handler SUPER**.

At a price point lower than a **Single Level** Hydra-Handler, the Hydra-Handler SUPER is a **safe, cost effective, efficiently sized, pass through,** battery exchange solution for customers with as many as 30 lift trucks

FEATURES

- Pass through design on both compartments
- Overall width - 52”
- Lift system - Direct lift by 2 hydraulic cylinders
- Roller deck lift (R)- LOW - 6” HIGH - 26”
- Fixed operator compartment (does not raise with roller deck)
- Drive system - Spring loaded 5th wheel (8”dia. x 6”w Polyurethane) floor drive with 4 rigid casters
- Extractor arm - Rollover and travel - independent sprocket and chain drive (Arm rotates low to handle short batteries of about 15” tall)
- Construction - Base frame - 4” x 3” x 5/16” wall, structural steel tubing
- Weight - 5,250 lbs

PERFORMANCE

- Travel speed - 125 FPM
- Capacity - 7,000 lbs
- Extractor arm capacity (vacuum) 1,200 lbs (push), 1,050 lbs (pull)
- Vacuum cup - 12” dia
- Lift speed - 8FPM
- 8 power rollers to speed extraction
- HPU Motor - 5 HP 460vac, 3ph, 60hz driving a fixed displacement gear pump for 6gpm @ 1250psi

SAFETY

- Foot Pedal
- Travel interlock if extractor arm is beyond frame (Optional)

OPTIONS

- AC or DC powered
- 1 or 2 compartments
- Strobe light
- High speed mode
- On board watering system
- 24” or 30” compartment
- Magnet extraction
- Supervisor On/Off key switch
- Battery management system
